

10 things you should ask your fertility specialist

1

What services, treatments and procedures does your clinic offer?

2

What tests, treatments or procedures do you recommend for us? And do we need them to conceive?

3

What are the risks involved in the tests, treatments or procedures you are recommending?

4

What are our chances of success based on our medical history and test results?

5

Are there any alternative options or lifestyle changes that you would recommend?

6

How will we communicate with you and the clinic if we have questions before or during treatment?

7

Will you be doing our ultrasounds, egg collection and transfers during our treatment?

8

What will happen if we decided not to go ahead with the recommended treatment?

9

At what point should we have a review appointment with you?

10

What are the costs? And when is payment required?
